DETAILED ACTION

Receipt of applicants' amendments and remarks submitted November 22, 2002 is acknowledged.

Claim Rejections 35 U.S.C. 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 71 and 73 are rejected under 35 U.S.C. 103(a) as being unpatentable over Niike et al. (JP Patent 04333694).

3. Niike et al. teach a copolymer of metha acrylate ester and an ammonium bearing monomer, wherein a monomer is a substituted diallylammonium. The substituents may be methyl, ethyl, propyl, hydroxylethyl, hydroxylpropyl, and dihydroxylpropyl. See, particularly, the CA Abstract, and page 3 lines 1-19 in the patent. The polymer is in an emulsion composition. See the abstract and column 5, lines 18-28.

4. Niike et al. does not teach expressly the substituent is a dihydroxylpropyl.

5. However, it would have been prima facie obvious to a person of ordinary skill in the art, at the time the claimed the invention was made, to employ dihydroxylpropyl group as the substituents because dihydroxylpropyl is one of the few known substituents. Regarding claim 72 and 74, note the claims are drawn to composition and therefore the preamble "therapeutic" does not carry any patentable weight. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the

Art Unit: 1617

body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951). Further, the polymer would read on the composition claimed herein since no other ingredient other than the polymer is defined in the composition. Note water in the emulsion is an inert pharmaceutical adjuvant materials.

Other claims pending in application are allowable as indicated in the prior office action.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
